

ResponseWare Web – Basic Participant Guide

This document explains how to use your *iPhone* or *iPod Touch* as a response device (“clicker”) for an interactive class session: **1. Create an Account, 2. Connect, and 3. Respond.**

Purchasing a license:

First, purchase a license from the TurningTechnologies Store (<http://store.turningtechnologies.com>). Currently, (Spring 2009) you can purchase a one-year license for \$16.00, or a four-year license for \$32.00

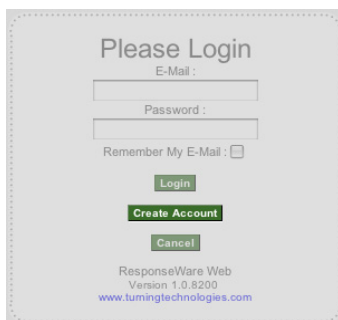

Creating your personal ResponseWare Web account

IMPORTANT: Please create your account BEFORE you attend a clicker class session, so that you will be ready to connect to the session when it starts.

1. Open your web browser (e.g., Internet Explorer, Firefox, Opera, Netscape, Safari, or your Mobile Web Browser.), or click the *RW Poll* shortcut icon . This will take you to **rwpoll.com**.
2. Click **My Account**. The login screen will then be displayed.

3. Click **Create Account**.

4. Enter your **license code**, **email address**, and **password**. You will receive your license code from a scratch-off card.

5. Click **Create Account**. A confirmation screen will be displayed and an e-mail will be sent to the e-mail address you provided.

Connecting to a ResponseWare Web session

This section will cover how to connect to a ResponseWare Web session.
 Step by Step Instructions Connecting to a ResponseWare Web session for participation.

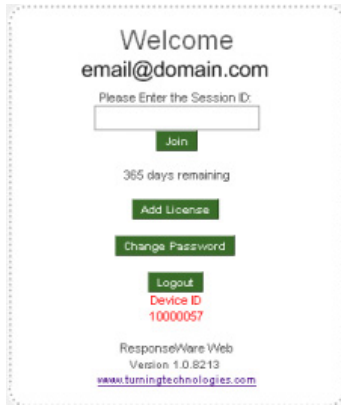

1. Once you have received your new ResponseWare Web password, go to **rwpoll.com**

2. Enter the Session ID.

3. Click **My Account**.
4. Enter your **Email Address** and **Password**, and click **Login**.

5. Enter the **Session ID** (the session ID will be provided by the presenter or on the presentation).

Welcome

www.tumingtechnologies.com

Note: The user information fields are not required to be completed to log in. If you wish to remain anonymous, just click Continue. Any information can be entered into these fields. The text entered is not case sensitive.

The user data you enter here is critical if your presenter is auto generating their participant list. The information that is entered on this screen will be what appears in there participant list for grading, analyzing or simply giving credit for group meeting environments. If you do leave this screen incomplete, then the presenter may not be able to give you credit for your responses.

7. Click **Continue**. The current polling status or questioned will be displayed. This screen will auto refresh once polling is open.

Welcome to Session 331230

Please wait for your presenter to begin polling.

Responding with ResponseWare Web

Once connected, the current polling status will be displayed.

1. When polling is open, select your response choice. If responding with a text based answer, enter the text and click Submit Essay.
2. Once TurningPoint receives your response, ResponseWare Web will indicate on screen that your response has been received.

Tip: You can change the ResponseWare Web application to display a standard keypad layout by clicking *Answer Text View* and setting it to *Keypad View*.

Note: You may change your response at any time while the polling is still open. It will only retain the last response received.

Once polling closes...

...the question results will be shown on your screen.
